

Guide for Oral Presenters

1. **Payment of the registration fee must be completed and oral presentation must be made in person as a prerequisite for the abstract to be accepted.** To register online, please click on the following website: <https://ivec2023.org/registration/>

2. Please prepare the Registration Number in the conference registration system in advance to facilitate on-site sign-in. You can check your Registration Number as shown in the picture.

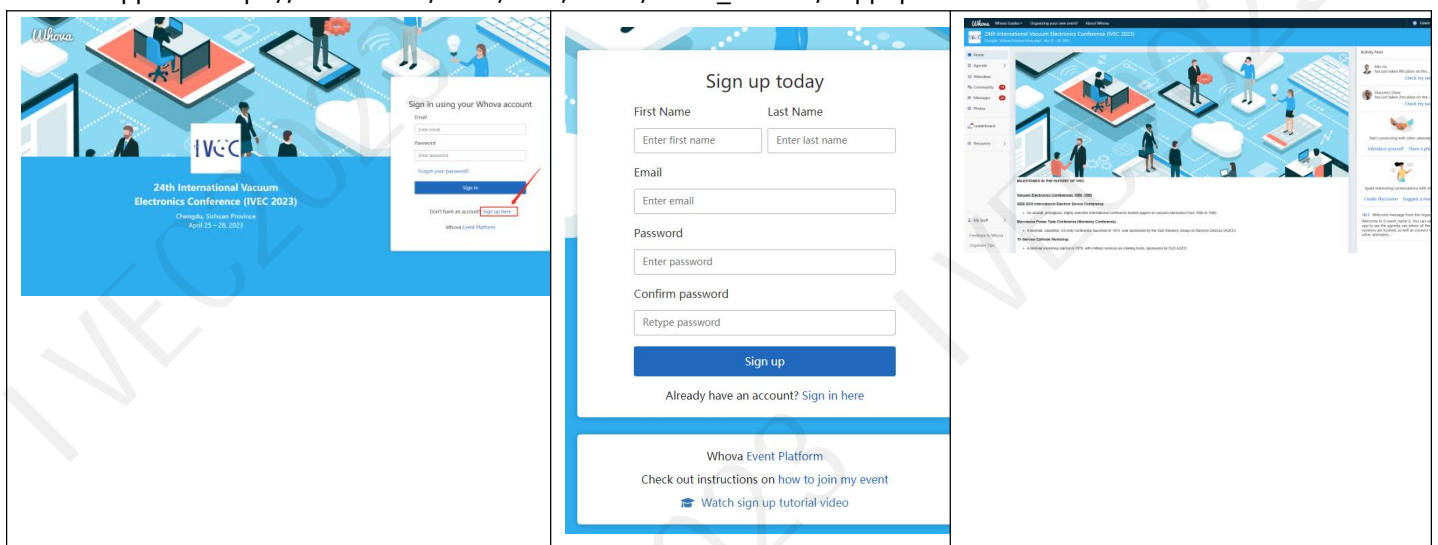

3. IVEC 2023 adopts a hybrid mode, which includes virtual and on-site venues simultaneously. The virtual venue uses the WHOVA conference platform, and participants from mainland China are required to deliver presentations on-site.

A. We will import the information of the registered attendees (email and name) into WHOVA conference platform. Please click on the corresponding email address to register and access WHOVA, which supports browser access and Android/Apple app login access.

B. On WHOVA, you can view all Sessions and Abstracts info; In case of missing any presentations you might be interested in, you can subscribe based on your personal preferences; you can view all Posters and exchange messages in the corresponding chatrooms; you can get access to all the recorded video files of all the session rooms at the end of each day; you can have one-to-one communication with all the participants; please go to WHOVA to learn more features.

C. WHOVA browser platform link: https://whova.com/portal/webapp/iveci1_202304/;

Mobile app link: https://whova.com/xems/view/basics/iveci1_202304/#app-preview-tutorial

4. The presentation time for Keynote Talk is 20 minutes (including Q&A session) and the presentation time for Oral Talk is 15 minutes (including Q&A session), please do not overrun!

5. Each on-site session room has a laptop with MS Office installed and a projector, where presenters need to arrive 10 minutes before the session starts, and an operator will be assigned to assist in loading the presentation files.

6. Presenters will have access to their session room (including online) from 8am-9am / 12.30pm-1.30pm every day (Wednesday 7.30am-8.30pm) to test ahead of time and help reduce any last-minute problems during their presentation. Online presenters need to prepare a computer for presentations, which is required to be equipped with a high-definition camera, clear microphone equipment, a stable and high-speed internet environment, and installed ZOOM conference client software (https://zoom.us/download#client_4meeting) in advance.

7. Online presenters are required to record a 15 or 20-minute long (no overruns) video of their presentation in advance and upload it to the Local Organizing Committee by clicking on the URL :

<https://www.dropbox.com/request/8Z2vu8wf7AEcyhZwWsph>

Each online presenter ought to live-stream their presentations to allow for live Q&As, but to avoid exceptional circumstances, please prepare a recorded video as requested.

8. The links to online session room will be notified to attendees by email one day before the conference starts. Please do not miss it.

ORAL PRESENTATION

SUGGESTIONS TO SPEAKERS

IVEC 2023 offers you a unique opportunity to reach an exceptional audience with your presentation. The atmosphere at IVEC is warm and collegial, and you can expect an alert, attentive and receptive audience when you speak. The following suggestions are intended to help you carry on the tradition of lively, informative presentations for which IVEC is known. Read it over -- we hope that even the most experienced speakers will find some useful suggestions in the following pages.

General

1. PREPARATION. Considerable time should be taken in the preparation of the Proceeding material and presentation of your talk. The two should have nothing in common but subject matter, for concise writing is one thing, and clear, engrossing speaking is quite another. Please do plan to allow yourself plenty of time to prepare for the specific task of making an oral presentation.

2. SHOW UP EARLY. Plan to meet with the Session Chairman near the speakers' platform 10 minutes before the beginning of the Session. The Chairman will have some final instructions for you and you may have some for him, and it takes time to get everyone squared away. This will also be your opportunity to give your visuals to the projection technician, along with any special instructions with respect to your presentation.

On Speaking

1. SPEAK UP. Address the microphone as recommended by your moderator. Speak distinctly and don't rush your words. Above all you must be heard, and those in the rear rows do want to hear you!

2. BE ENTHUSIASTIC. It's infectious. Putting across the excitement that your paper should generate is the best way to make the audience catch fire. If you let the audience see and hear your enthusiasm for the subject, they'll pick up on it and stay

with you. Let them in on the fun!

3. KEEP IT SIMPLE. Your audience came to be enlightened, not confused, to be told results, not to relive every step of your research. Avoid long mathematical developments: present in words only the highlights and the logical basis of your proof, then show the results and interpret them fully. Your research took months -- or years-- but what counts is the substance and significance of the end result.

4. LANGUAGE. Very specialized terms and acronyms should be used sparingly and only after they have been carefully explained to the audience. Any paper delivered at IVEC 2023 should be intelligible to anyone else attending the symposium, even though he might not be a specialist in that particular area.

5. OUTLINE, PRESENT, AND SUMMARIZE. The written word is permanent, and each of us reads and re-reads it at our own pace. The spoken word is transient and the speaker sets the pace. Your audience needs time to absorb each thought and can't review what you've just said without missing what you're about to say. Give your listeners a chance to keep up and reinforce your message by reviewing it with them. Begin with a brief introductory summary of your thesis that places your work in the context of familiar material. Then go through the thesis slowly and in detail, amplifying each point and explaining fully. Finally, in the last couple of minutes, summarize again, in terms of your conclusions and plans for future research.

6. AVOID READING YOUR PAPER . . . USE NOTES. Your speaking style should be relatively informal and relaxed, compared with a written research report. An informal style is usually easiest to achieve if you speak from notes, rather than read a prepared speech where every word has been written out in advance. It is better to prepare a complete set of notes for continuing reference. Speaking from notes allows you more flexibility to adjust your talk to the mood of the audience. If you do write out your talk, avoid the condensed, formal language you would use in a written presentation. Instead of "Upon examination of the maximum characteristic shown on slide 6 it is evident that . . .", write "Now, look at the top curve on this slide and you'll see that . . ."

Notes should be typed with key words underlined. No matter how full your notes, you will communicate better if you try to look at your audience more than three-quarters of the time. You can do it with practice.

7. REHEARSE YOUR TALK AT LEAST TWICE WITH A PRIVATE AUDIENCE. Professional actors and politicians rehearse important speeches -- so should you. Ask your rehearsal audience for suggestions and reactions, especially about pacing -- they'll be able to tell you whether you're throwing out new ideas too quickly to be grasped or moving too slowly to maintain high-level interest. Audio/video recording and listening to/watching yourself may also give you valuable pointers; the way you think you sound may not actually be the way you sound! Time your talk, change it to make it clearer. With enough rehearsal you will be able to abbreviate your notes or do without them altogether, and that will let you make much better contact with your audience.
